Thanks for visiting and good luck![Chronic obstructive bronchitis in sanitary workers: study with questionnaires]. An epidemiological and observational multicenter study was performed in workers exposed to a petroleum product used in a pharmaceutical company. The study considered a population of 633 sanitary workers stratified according to their place of work (inside or outside warehouses). The study was carried out in two phases: the initial phase included a questionnaire completed by the participating workers and the second phase was made up of a physical examination. Workers exposed to noxious agents in the warehouses showed a slightly more rapid decline of pulmonary function than those in non-noisy surroundings ($p = 0.065$). We did not find this difference in the decline

We've since seen the technology used for a 3D-printed ring, a 3D-printed calculator and many other things, but in the year 2013, we got the 3D-printed ring that really fired the imagination of the public. Now, it appears that within a year or two, fans will have a 3D-printed Hulk that they can smash into Blu-ray cases. According to WB Collector, a site dedicated to 3D-printed Blu-ray discs, a 3D-printed Hulk will be released "in the third week of December, with thousands of the plastic discs sold at Target retail stores and online." The discs will come out in many different variations, one of them being 3D-printed (as seen on the right). The discs themselves will be 3D-printed, but the artwork will be printed on a regular Blu-ray disc using a laser. The designs are being pulled from several sites, like this art site which has this design for a Hulk in 3D-printing form. This 2D design is still in the works, but if Warner Bros. were to release it as a real 3D-printed disc, the first thing you'd notice would be the shell of the disc. And we're not just talking about the 3D-printed shell, but an actual design into the disc itself. It wouldn't be quite as cool as a 3D-printed Hulk, but it would be a cool concept nonetheless.
