Emailsmartz Email Sender Basic X64 [April-2022]

* easy to send bulk emails * fast delivery with high conversion rates * customizable emails and messages * easy to use and maintain. * bulk email sending, email checking and email reports. Note: If you want Email Sender as a high-speed, targeted email sending program with pre-defined (templated) emails and messages, we recommend that you consider the other Email Sender systems. Email Sender is the user friendly and most automated emailing utility that gives you the ability to send unlimited emails with email address you want to send email or send bulk emails. Main Features: 1. Email Sender's Mailer page lets you add unlimited emails (contact details) to your mail. 2. Get alert emails (customizable) from your email account. 3. Send emails at once 4. Send emails to many contacts (to use your address book) in one click 5. Get email reports 6. Watch your emails' progress and statistics 7. Send email via.smt,.msg,.rfc format. 8. Works with any email address 9. Send emails to both Windows and Mac systems (tested) You can add different emails and contacts to mail using Mailer page. The contact has to be on MS Outlook, Gmail or Yahoo Mail accounts. You can also download the contact records from outlook or gmail and update those on Email Sender. You can also create custom templates for bulk email sending. Email Sender by MicroSoft is a fast web based bulk emailing tool that sends a message to a large number of users at once. MailSender is a message auto-sender that can send out a large amount of emails. MailSender uses a list of email addresses to send a message to a number of people. The addresses are not stored on MailSender's end. MailSender only sends the message to the addresses that you provide. You can select the address type. The options are fixed addresses and groups. With fixed addresses, MailSender sends messages to a specific address. With groups, MailSender sends messages to all addresses that are in the group. You can control the message content through MailSender's message editor. You can edit text and HTML and images through this editor. MailSender is light weight, easy to use, and works on a web server. MailSender uses MySQL as its database

What's New In?

Email Sender is a simple tool that you can use to send targeted or bulk email to your subscribers easily, speedily and at low cost. With the Emailsmartz Email Sender you can send

messages to the subscribers who have the latest mail (0-3 days old). The advantage of using emailsmartz is that you can send your mails right in your own program and no longer need to go to the recipient's mail or use third party email clients to send out your bulk mail. There are two versions of Emailsmartz: Email Sender PRO Email Sender Basic Emailsmartz Email Sender PRO What is your Email Sender PRO: Email Sender PRO supports several features that are not supported in Emailsmartz Email Sender Basic version: Email templates. Ability to generate unsubscribe links from your messages. Compatibility with Microsoft and non-Microsoft email clients. Email Sender PRO has a user-friendly interface that makes it easy to work with templates, create and send bulk email messages. With Emailsmartz Email Sender PRO, you can import up to 500 templates. The template structure is simple. Most of the fields are automatically filled in and you don't need to write special instructions to create this structure. The template name can include selected parts of the email message. Subscriber groups. Subscriber groups have many advantages. These groups can be defined as dynamic, you can add or remove subscriber groups any time you want. Subscriber groups can be used to split your message into several parts. The part that contains the interesting information can be sent to one group and the part that includes the sending message can be sent to a different group. You can assign different template formats to the groups. Message priority levels can be assigned to each group. This way, you can control what content gets the highest priority. Compatibility with Microsoft and non-Microsoft email clients. Emailsmartz Email Sender PRO Version: Email Sender PRO version works with the Microsoft Outlook 2002, 2003 and 2007; Outlook Express 6.0 and greater, Eudora 6.0 and higher and Lotus Notes. It does not work with other email clients or
