There is an adware called "Needed Files Downloader" that has an annoying and intrusive ads. Some users are able to

---

remove these ads by running an  
adware program called  
"Uninstaller Pro". Click on this  
link to read more on how to  
remove "Uninstaller Pro".

Q:  
sorting user input for dicts

So, I  
have created a class that creates  
dictionaries. And, I have a  
function that allows the user to  
type in a word. The function  
would then create a dictionary  
that stores the word as the key  
and the number of uses as the  
value. Example: "Hello" would  
be {"hello":1, "hello again":1}

I  
want to create a function that  
would allow the user to type in a  
word, and it would store the  
word in the dictionary. And

---

then, I want it to sort the words, so that the most commonly used words are at the top. So, for example, if the user typed in "hello", and the dictionary looked like this: {'hello': 1, 'he': 1, 'he
