This study was designed to examine the effects of endurance training and hormone replacement therapy (HRT) on the secretion of insulin and glucagon in 16 healthy sedentary elderly women with type 2 diabetes. Subjects were randomized into two groups. The exercise group participated in a 20-week endurance training program and the HRT group received 0.625 mg conjugated estrogens and 2.5 mg medroxyprogesterone acetate per day in addition to a placebo. Training significantly improved the following maximal exercise parameters: heart rate, systolic blood pressure, rate of perceived exertion, oxygen consumption, and lactate concentration at the anaerobic threshold. There were no significant training effects on fasting plasma glucose, serum insulin, C-peptide, glucagon, or glucagon-like peptide-1. Hormone replacement therapy had no effect on fasting plasma glucose or insulin, but significantly decreased the fasting C-peptide concentration by 2%. Hormone replacement therapy also decreased fasting glucagon levels by 26%. These data indicate that in elderly women with type 2 diabetes, the effect of HRT on C-peptide secretion is substantial and is not limited to the first phase of insulin secretion. The abandoned car was spotted on the side of the freeway at Coppin Creek between Black Rock and Carole Park on Sunday morning. Staff with the RSPCA found the cat, which was badly burnt, inside and took the poor animal to the organisation's Coppin Creek animal shelter. Those who found the cat told the RSPCA the car may have been there for about eight days. Cat services spokeswoman Karina Gibson said the male cat, which was found in an undamaged car, was treated and fed. The cat, who has not been identified yet, is being held at the Coppin Creek animal shelter. "I can't believe they got away from that - it's not that he's thinking about what he has to do, or what he's going to do to stay alive, he's just going to look after himself," she said. "He's obviously very, very smart." RSPCA staff have inspected the cat's injuries and are investigating the circumstances. The cat remains at the shelter, where staff will keep it until the next of kin

The bad news is that it was quite a scary experience, for some reason whilst I was sitting down, as I remember doing before, my bladder just wouldn't let go and would actually play my kidneys like a fiddle. I've been to the loo with bouts of similar occurances before, but this was different, this was the longest lasting bout of my bladder swelling that I have ever had, and had I been at work, it would have been a lot more embarrassing. This is just one of the many health problems
