The user can try to decipher the code shown in this puzzle; it will have to complete four blocks before being able to solve it. The first block is a sequence of letters, which, if duplicated, will form the word 'DEAR'. The second block is a string of numbers which, when placed end-to-end, will spell out a telephone number: "D236035". The third block is a sequence of numbers that, when multiplied, will give the digit '5':"46898". The last block is a sequence of letters, each one of which, when read in any order, forms the letter 'P'. Puzzle Solution: The first block spells out 'DEAR', the second block spells out 'D236035', the third block spells out '46898', and the last block spells out 'P'. Puzzle Timeout: You have 90 seconds to solve this puzzle. Riddles - Builder's Edition. It's the second sequel of the first Riddles ever published. Jigsaw puzzle is one type of puzzle that will offer you endless fun and excitement. You can play the game in two modes: - Paint mode - in which you can draw a piece of the completed puzzle, and then complete it. - Self mode - when the entire puzzle has been drawn and you have to start putting the pieces on the board one by one. You can play in either of these modes a number of times, or play indefinitely. Many people love playing jigsaw puzzles. But when you buy a jigsaw puzzle, you always ask yourself how much you will get out of the puzzle. This is because it is difficult to know how much fun you will get from it when you are completing the puzzle.

Features: This software makes it simple to create your own puzzle picture files without the need to print them out. The program supports almost all Windows compatible devices and is able to create a puzzle picture with any number of pieces, displaying the pictures of puzzle pieces available on a variety of screen sizes. The program helps you to create tile-based (Tiled) jigsaw puzzles using any image format, including JPG, GIF, PNG and BMP. It will also make a 100% wallpaper for your desktop. When you are done, it will create a jigsaw puzzle picture file that you can send to others or post to your favourite social networking site. This multi-functional program is unique in many ways, allowing you to use various techniques and tools to create a jigsaw puzzle picture, such as: - Combine and split pictures, as well as draw new blank - Add blank space to a picture, or delete blank space from a picture - Rotate picture - Add sticker - Use graphic programs or paint programs - Draw picture with pencil or brush - Draw picture with markers or pens You can create a template, based on a picture of your choice, which has a blank space of any size on the selected location. You can use it as a starting point for a new picture, by using picture editing software like Adobe Photoshop or Paint.NET or any other picture editor or paint program. With the item placement puzzle template, you can place tiles of pictures of your choice on any random board to create a unique and challenging picture puzzle. You can also place the tiles on a grid, if you want to create a puzzle with an even boarder. The pieces of a puzzle are generated randomly. There are three random options for the picture pieces: Normal (
