
interested in the power of knowledge are more and more compelled to simply remain on the side-lines and not participate in the power struggle. The fact is that in every forum at which science and its knowledge is discussed: in environmental and wildlife movements, in religions, in ethics, in politics and economics, in discussions of drug use and abuse, even amongst conspiracy theorists, it is being contested. Every day millions upon millions of people are exposed to the world of the "knowers" and their worldview. The worldview of the people of reality-land. Both in the scientific community and amongst those who play on the side-lines, there is a fascination and a fascination with the pseudoscience of the anti-scientists. We are all fascinated by them. You can't help but be intrigued by their views. But then we know that "fascination" is where interest and information meet to form knowledge. This is what fascinates us.

Many of the "pro-science" initiatives f30f4ceada
