This guide is intended to help beginners to learn the first steps in using Photoshop Elements (most of the tutorials are applicable to any version of Photoshop as well). It does not cover editing of raw files or editing of video. To learn to use Photoshop Elements effectively, you'll want to spend about 1 hour or more per day for the first two or three weeks working on it and then take a break from it for a week. You'll want to use Photoshop Elements during your vacations. In the beginning, you may spend hours on your computer, and that's fine. However, you need to make some time between using it and doing something else for a week or so. In a day, you'll be creating some good work, but you will probably lose a few hours on small details and fix the small issues that remain. It's all about keeping your motivation and efforts up. Let's learn the tools you'll use in Photoshop Elements. If

you're a new user to the program, you may want to start with Photoshop Elements 10. If you're a longtime user of Photoshop CS5 or newer, you may want to start with Photoshop Elements 13. This guide will work in both versions of Photoshop Elements. Note: this is a beginners tutorial, and it assumes that you have not already mastered any aspect of photography or Photoshop, such as how to create images from scratch. If you're a pro photoholic like me, you'll have a few hours to spare to review the beginner tutorials. Opening a new document: When you start a new document, you'll need to set a size for your canvas. This will keep you from a few irritating situations: If you want to add text or an image in the middle of the document, Photoshop Elements needs a lot of space to work properly. When you're creating a design for print or a poster, the image needs to be a minimum of 800 pixels wide. The user interface offers 8 presets that include 500, 600, 700, 830, 900, 1000, 1200 and 1500 pixels width. If you want to edit an image and add text or a logo before you save, you'll need to work within the confines of the preset width. Here's how to change the canvas size: 388ed7b0c7
