This is a movie game that combines a social networking experience with a Text based game. This is NOT a story of a classical "Beauty and the Beast" type. The Character Nami is a "Modern Girl" who excels in both academic and athletic subjects, and thus, is also considered to be a perfect student. She's too good to be true. The real reason of her perfection can only be discovered at the end of the story. You can now enjoy this thrilling adventure and open the door to explore the story's full meaning! In this movie game, you can chat with the other characters, read the news and earn "points" by answering questions. Plus, you can have access to a secret Gallery of Art Images with their respective secret trivia information! In addition to that, all the points you score will also be added to your reputation and unlock new achievements as you progress with the story. Q: Will there be a Sequel? A: There are no promises at this time. But I do hope to hear feedback from you. Also, during the development of this project, I have myself designed and created all the artwork and animation. I hope to unveil more of the story in the future! Thank you for your support! Rest assured, I will continue to do my best to create original content. Please keep visiting the official Website. Thank You.

Starman in space - OST is an action game where you'll have to destroy all viruses from the perspective of the hero. You must sneak across 3 environments, and stay undetected. You'll have to be calm and methodic in your movements, or you'll get noticed immediately. And in the case of this game, you have only one life - for every mistake you make, you lose a life. The one who is most careful will score best, and you'll be waiting for those times when you have to attack in order to survive, but for now, keep it cool and you'll be fine! Key Features: - There are 12 levels in the game.- There are 3 different types of enemies.- You can pick up objects.- There are 8 achievements.- The game is in English.- Players can buy this game in the Facebook marketplace for 4.99\$ No-Spoilers \*\*\* Game is not pay for what you buy. Buy it and give a good review. \*\*\* Reviews: "A fun game..." 2.1 - Review by LJGamingSoft "If you like action platformers this is your game. Shoot, jump, switch, shoot, jump, switch over and over again." 4/5 - Review by tonypooya "If you have played the original kind of platform game and were looking for a 2D remake, this game is a must play" The game comes packed with 6 different characters to choose from. Each player can choose a different character out of the 6. Each character comes with their own special skills like the Blocker, the Shooter or the Dancer. I personally play as the Blocker because he is the most conservative and has the largest move set. He is the healthiest and longest legged of the 6 characters and he makes a solid base to build from. As a Blocker I could reach more platforms and jumps from my teammates than with any of the other characters. The Blocker is the main protagonist of the game and has the most control over it's own character. However, once you realize that you can swap your characters at will it may seem to get kind of repetitive once you've played the game a couple of times. To prevent this repetitive gameplay there are special stages where you are only allowed to use one character. The developers have provided you with a host of different stages and locations to switch between. This allows
