this is a cambam model, not a reaxys model. this is a 15 line body for cambam plus 0.9. i was going to do a model for the cambam plus 0.9 but again i dont have time. the cv was made in sc4 and the body assembly was created in cambam plus.. it was a cam that i made to test 1.0b9 and the cv was 1.0b4. there were some revisions to the assembly that were needed to make the cv acceptable for cambam plus 0. if you need a cv for reaxys make sure to contact me so that i can make you a model that you can use on the reaxys website. models with mechanics are for cambam plus only. do not try and use them on the reaxys site. if you need to submit them for an academic paper then contact me. shopping for cnc accessories? discover the timepiece that fine-tunes your machine.yawplation.com by yawplation.com. handcrafted using fdm equipment, yawplation provides engineers with a variety of industrial parts that are the benchmark for 3d-printing. stay tuned for upcoming 3d printing announcements of new products coming soon!.. i have read the terms of use. bestcambam : your pdf source is 456

bytes long. techsmith word 2010..pdf dictionary file (source) 5.9mb.doc dictionary file (source) 6.1mb. pdf source file size 456 bytes. is there anything i can do? i can't find anything wrong with my source. i mean it saves fine to disk but when i import it to my computer it has the same length. i have gimp installed in wine, but i dont know if thats even installed.
